

Felke GemVital Gemstone Water

High quality gemstones vitalizes – drink it daily
Genuine gemstone water – health for body and mind

– Water - simply irreplaceable –

Most of our body is water. With newborns it is 75 – 80 % of their body weight, with adults it is 60 % and with elderlies 50%. With this there is already much said about the importance of water. So don't forget to drink water regularly and abundantly. Preferably Felke GemVital gemstone water.

Without water there is no life and without drinking we cannot keep up our body functions and survive. 72 % of our planet's surface is water 2,5 % is fresh water but only 0,3% is drinking water – often contaminated and without positive effect.

Once our healing water, spring water, table water or tap water was rain falling from the sky. It seeped into the ground, was filtered and cleaned by multiple rock formations that gave it its distinctive and individual taste. Soil and rock infuses it with natural properties. We use this natural phenomenon in our Felke GemVital Gemstone vial.

High quality gemstones vitalize directly effectively and naturally.

The animating power of gemstones on water was already known in antiquity. As a pioneer of alternative medicine Hildegard von Bingen (1098 – 1179) used the healing power of many gemstones for drinking water and paved the road for a successful advancement in this field.

In the wake of this advancement we spent the last five years developing our GemVital Gemstone vial.

We cannot confine stones.

Vitalizing gemstones and water are now in direct contact. This is natural and effective just like water and stone has been in contact for millions of years. With GemVital you are drinking animating, vitalizing, genuine, high quality gemstone water.

Direct genuine gemstone water with the GemVital Gemstone flagon.

The GemVital gemstone staffs are mouth-blown from pure high quality glass. Through the long inclined neck the gemstones slide easily into the glass globe. With careful shaking they slide out just as easily. The gemstones are in direct contact with the water through three holes at the bottom of the glass globe in interaction with the openings at the crest on top of the glass globe.

The fascination of this lively water can be seen and heard. After 10 minutes, 2 hours at most, the gemstone water is sufficiently and powerfully vitalized. Dipping the staff in and out intensified the impact.

After use the gemstones can be easily cleaned with running water through the neck of the staff. To change, unload, thoroughly clean or recharge the gemstones, carefully shake them out through the neck. The staff too needs to be cleaned after elongated use, preferable with biological rinsing agent..

The Felke GemVital gemstone vial combines practical design and intensive effect – direct, animating, natural, energetic, vitalizing and unique.

Drink gemstone water for a long vital and healthy life.
